

ARERA DCO 375/2019 on RE and Ret components to cover energy efficiency investment costs.

EFET response – 29 October 2019

The European Federation of Energy Traders (EFET)¹ welcomes the opportunity to provide our comments on ARERA's consultation on how to fund RE and Ret components to cover energy efficiency investment costs.

We appreciated the quantitative and regulatory analysis of the consultation. We understand that the reform will start from the 1st of January 2021 and we would like to only express that the following Deliberation should have a clear timeline as the proposed changes will have an impact on electricity wholesale prices (PUN) and it might affect trading, including hedging and forward contracts in general.

¹ The European Federation of Energy Traders (EFET) promotes and facilitates European energy trading in open, transparent and liquid wholesale markets, unhindered by national borders or other undue obstacles. EFET currently represents more than 100 energy trading companies, active in over 27 European countries. For more information: www.efet.org
